Below is a consolidated list of Unilock's official maintenance resources. Product availability and instructions may vary by region. Please check the Uniloc website for updates

General concrete pavers and slabs

Applies generally to Unilock concrete paving products, including Classic, EnduraColor, EnduraColor Plus and products not carrying specialized care instructions.

- Unilock Product Care Guide—PDF
  Product line: Concrete pavers and slabs generally.
  Topics: Routine cleaning, efflorescence, stains, joint sand, sealing and protective treatments.
- How to Clean Pavers
  Product line: Concrete pavers and slabs, including EasyClean products.
  Topics: Routine washing, stain identification, cleaning products and pressure-washer practices.
- Cleaning and Removing Stains from Pavers
  Product line: Concrete pavers and slabs.
  Topics: Oil, grease, rust, food, organic stains and general stain removal.
- How to Seal Pavers
  Product line: Unsealed concrete pavers and slabs.
  Topics: Surface preparation, selecting sealer, application, drying and curing.
- Commercial Paver Maintenance Guide—PDF
  Product line: Concrete interlocking pavers in commercial or high-traffic installations.
  Topics: Pressure washing, stains, gum, rust, joint maintenance, sealing, snow removal and repairs.
- How to Protect Your Paver Project for a Lifetime
  Product line: Concrete pavers covered by the Unilock Lifetime Guarantee.
  Topics: Periodic cleaning, sealers, environmental exposure and warranty-related care.

EasyClean factory-sealed products

EasyClean is offered on selected products such as Umbriano, Arcana, Town Hall, Richcliff and Courtstone, as well as certain region-specific products bearing the EasyClean designation.

- EasyClean Technology and Care Information
  Product line: Products specifically marked EasyClean.
  Topics: Factory-applied integral stain resistance, prompt spill cleanup and differences from aftermarket sealers.
- EasyClean Contractor Technical Information
  Product line: EasyClean concrete pavers and slabs.
  Topics: Factory treatment, stain resistance and appropriate product expectations.
- Fall Maintenance Instructions
  Product line: Concrete pavers, with specific EasyClean guidance.
  Important point: Unilock states that factory-sealed EasyClean products do not require the periodic aftermarket sealing described for untreated pavers.

Before applying any additional sealer to an EasyClean product, obtain written product-specific approval from Unilock.

Natural-stone products

Applies to Unilock sandstone, limestone, granite, quartzite, lavastone and other natural-stone paving and coping products.

- How to Clean Natural Stone
  Product line: Unilock natural stone.
  Topics: Gentle cleaning, stain assessment, protecting joint material and when stronger cleaners may be appropriate.
- Natural Stone Installation and Care Guide—PDF
  Product line: Unilock natural-stone paving, slabs, coping and overlay products.
  Topics: Cleaning, acids, sealers, mortar and grout, drainage, pool applications and UniCare cleaners and sealers.

This is the most important document for the natural-stone project involved in the lawsuit. It should be incorporated into future natural-stone contracts by date and revision.

Porcelain landscape tile

Applies to Unilock porcelain products such as Del Conca, Arbor, LaScala, Gotham and other regional porcelain collections.

- Porcelain Landscape Tile Installation Guide—PDF
  Product line: Porcelain landscape tile.
  Topics: Aggregate-base, concrete-overlay, pedestal, wood-deck and pool-deck applications; drainage and installation care.
- Porcelain 20 mm Technical Sheet—PDF
  Product line: Unilock 20 mm porcelain tile.
  Maintenance instruction: Unilock states that porcelain cleans with ordinary soap and water and cautions that porcelain may be slippery when wet.
- Porcelain Product Sheet—PDF
  Product line: Regional Unilock porcelain collections.
  Topics: Product limitations, permitted applications and warranty information.

Porcelain should not automatically be treated with concrete-paver cleaners, acids or sealers.

Permeable paver systems

Applies to permeable products such as Eco-Priora, Eco-Promenade, Eco-Hex and other Unilock permeable pavement products.

- Unilock Technical Guides Library
  Product line: Permeable and heavy-duty segmental paving systems.
  Included resources: Unilock Permeable Paver Maintenance Guide and the Permeable and Heavy-Duty Segmental Unit Pavers Technical Guide.
- Product Technical Sheets
  Product line: Individual permeable products, including Eco-Priora, Eco-Promenade and Eco-Hex.
  Topics: Product-specific dimensions, applications, joint materials and technical requirements.

Permeable pavement maintenance must include vacuuming or appropriate surface cleaning to preserve infiltration. Conventional joint-sand replacement should not be performed unless the replacement aggregate complies with the permeable-system specification.

Joint sand and polymeric sand

- Unilock Polymeric Sand Guide
  Product line: Concrete pavers, natural-stone pavers and clay-style paving products where polymeric sand is approved.
  Topics: Joint preparation, sweeping, compaction, activation, curing, replenishment, residue and hazing.
- Unilock Joint Sand Technical Information
  Product line: Interlocking concrete pavers.
  Topics: ASTM C144 joint sand, joint stability and maintenance importance.

Seasonal and winter maintenance

- Seasonal Paver Maintenance
  Product line: Concrete pavers and slabs generally.
  Topics: Year-round cleaning, stain prevention, sealing and snow care.
- Spring Paver Maintenance
  Product line: Concrete pavers, including EasyClean products.
  Topics: Debris, weeds, stains, low-pressure washing and joint-sand protection.
- Summer Paver Maintenance
  Product line: Concrete pavers and slabs.
  Topics: Spills, stains, weeds, joint maintenance and sealing.
- Fall Paver Maintenance
  Product line: Concrete pavers, including EasyClean products.
  Topics: Organic debris, cleaning, joint inspection, sealing and winter preparation.
- Winter Paver Maintenance
  Product line: Concrete pavers and slabs.
  Topics: Snow removal, ice control, plastic-edged equipment and winter precautions.

Walls and U-Cara products

- U-Cara Product Guide—PDF
  Product line: U-Cara retaining walls, modular structures and wall-mount systems.
- U-Cara Installation Manual—PDF
  Product line: U-Cara fascia panels, SureTrack backers, seat walls, pillars, fire features and outdoor structures.

General concrete-product cleaning guidance may be relevant, but cleaners, pressure washing and sealers should not be applied without confirming with Uniloc compatibility with the particular fascia or wall product.

Cleaner and sealer product documentation

- Unilock Safety Data Sheets
  Product lines: Products treated with Unilock-distributed cleaners, sealers and related chemicals.
  Documents include: Efflorescence cleaners, oil-and-grease cleaners, water-repellent sealers, enhancing sealers, strippers and other treatment products.

Safety data sheets are not complete application instructions. The product label and current technical data sheet will contain additional instructions
